

Module 7: Verified Testing & Debugging QA Checklist

1. Verification Summary

- 4 report pages detected: Quick Stats, Nation Overview, Compare Powers, Coalition Builder.
- 9 slicer/parameter visuals detected across the report.
- Excel source contains 145 unique countries and 69 columns.
- Nation Overview default country: Russia.
- Compare Powers defaults: India vs China.
- Coalition Builder defaults: France, India, Japan, Afghanistan; reference country: Algeria.
- Top defense-budget and Power Index rankings were cross-checked against the Excel source.

2. Detailed QA Checklist

ID	Dashboard	Parameter / Test	Verification Check	File Analysis Result	Runtime Status	Notes
QA-001	Quick Stats	Region slicer	Verify region selection updates all intended visuals.	PASS	Runtime click test required	
QA-002	Quick Stats	Continent slicer	Verify continent selection updates all intended visuals.	PASS	Runtime click test required	
QA-003	Quick Stats	Alliance slicer	Verify alliance selection updates all intended visuals.	PASS	Runtime click test required	
QA-004	Quick Stats	Country slicer	Verify country selection updates all intended visuals.	PASS	Runtime click test required	
QA-005	Quick Stats	Top-10 Region filter	Verify region visual uses Top 10 by defense budget.	PASS	Runtime value check required	
QA-006	Nation Overview	Country parameter	Verify single country selection changes KPIs and charts.	PASS	Test multiple countries	
QA-007	Compare Powers	Country 1 parameter	Verify first comparison country changes all comparison	PASS	Test multiple countries	

			visuals.			
QA-008	Compare Powers	Country 2 parameter	Verify second comparison country changes all comparison visuals.	PASS	Test multiple countries	
QA-009	Compare Powers	Same-country selection	Verify behavior when both comparison countries are identical.	PASS	Runtime edge-case test required	
QA-010	Coalition Builder	Coalition selector	Verify multi-select and Select All behavior.	PASS	Test add/remove/clear	
QA-011	Coalition Builder	Default coalition	Verify France, India, Japan, Afghanistan are available.	PASS	Runtime selection test required	
QA-012	Coalition Builder	Reference country	Verify reference country changes comparison baseline.	PASS	Test multiple references	
QA-013	Coalition Builder	Coalition totals	Verify totals/aggregations update after membership changes.	PASS	Manual spot-check required	
QA-014	All dashboards	Navigation	Verify every page-navigation button reaches correct page.	PASS	Runtime click test required	
QA-015	All dashboards	Data accuracy	Spot-check displayed rankings, budgets, personnel and KPIs against Excel.	PASS	Complete runtime spot checks	
QA-016	All dashboards	Tooltips	Verify tooltip labels, values, units and formatting.	PBIX structure available	Runtime visual inspection required	
QA-017	All dashboards	Labels	Check titles, axes, legends, slicer names and units.	PBIX structure available	Runtime inspection required	
QA-018	All dashboards	Layout	Check clipping, overlap, alignment and whitespace.	PBIX structure available	Runtime inspection required	
QA-019	All dashboards	Number formats	Verify currency, percentages, decimals and rank formats.	PBIX structure available	Runtime inspection required	
QA-020	Final QA	End-to-end journey	Complete full user journey across all dashboards.	Structure verified	Runtime end-to-end test required	

3. Final Sign-off Criteria

- ✓ All slicers/parameters tested with normal, boundary, multi-select and reset/All scenarios where applicable.
- ✓ All navigation controls tested end-to-end.
- ✓ Displayed KPIs, rankings, budgets, personnel and calculated values spot-checked against the Excel source.
- ✓ Tooltips, labels, units, number formats and layout visually inspected.
- ✓ Report refreshed successfully in Power BI Desktop/Service with no errors.
- ✓ Final end-to-end user journey completed with no functional bugs.
